

Tour Our Facilities

Video tour of our Surgical Center Facilities

Paddock Park Surgery Center is an on-site free-standing outpatient surgical facility. It is the only surgical facility in the area that is dedicated exclusively to plastic surgery. The surgery center is attached to the practice office building thereby allowing easy access to the surgery center for our patients. It is fully licensed and certified with state-of-the-art equipment to protect your health and well-being. It is designed with your safety, comfort and privacy as our primary concerns. Our professional nursing staff is trained and skilled in the most advanced aspects of plastic surgery. They are caring, sensitive and concerned about your safety and comfort and they are dedicated to making your plastic surgery experience a positive one.

Our operating rooms and recovery rooms undergo stringent inspection by the State regulatory agency for surgical facilities and are accredited for major surgical procedures; the highest possible rating. We have dedicated anesthesia staff who are skilled and who have a specific interest in plastic surgery patients. They can provide a wide range of anesthesia choices which are determined to provide safety and comfort during your procedures and which can include general anesthesia.

Many factors go into determining where a surgical procedure is best performed, but in all cases, the patient's comfort, safety and the requirements of the operation determine whether it is best performed at our center or at the hospital. Our four plastic surgeons have hospital privileges at Munroe Regional Medical Center, Ocala Regional Medical Center, and West Marion Community Hospital. For your recovery most of our patients choose to recover at home with responsible adult supervision. For long-distance travelers, out of town patients and patients whose families reside out of state, there are several area alternatives which include local hotels, after-care facilities and home care nursing care. Our office can provide you with information on these alternatives.
